

## Special Build Agreement

You are entering into a contractual agreement to have Canadian Performance Warehouse produce a special build radiator or cooling related product. The process for producing this product is as follows:

- 1) Contact a Canadian Performance Warehouse (CPW) representative to discuss your needs.
- 2) Prepay for product. This will secure engineering and design time before any drawings or a purchase order can be created on your behalf.
- 3) Once the drawing is completed to your satisfaction and you have signed and faxed it back to CPW the build process can commence.

If at any time you wish to cancel your order, you will be responsible for all costs incurred up to the point of cancellation as follows,

- 1) 20% of the total cost if cancelled once drawings and purchase order are complete.
- 2) 100% of the cost if you cancel once the product is in production.
- 3) Your total cost for this project will be \$\_\_\_\_\_.
